International Year of the Salmon

INTERNATIONAL YEAR OF THE SALMON

The International Year of the Salmon (IYS) is an initiative to inform and stimulate outreach and research that aspires to establish the conditions necessary to ensure the resilience of salmon and people throughout the Northern Hemisphere. We want to bring people together, share and develop knowledge, raise awareness and take action.

2019 is the focal year of the IYS, with research and outreach continuing through to 2022.
